

K WRN-02B

**K-type Stainless Steel Probe, Scanners & Testers
Temperature Probes & Sensors WRN-02B Needle
Thermocouple Handheld Thermometer Probe[3 *
80mm]**

- **Safe Use:** Insulated plug, high temperature resistant, anti electric leakage plastic, comfortable to grip, convenient to hold and easy to operate.
- **Wide Applications:** Widely used in textile printing and dyeing, papermaking, plastics, rubber, ceramics, aluminum alloys, granaries and other sectors.

- **Easy To Use:** Probe has a wide range of use, is not limited by the surface shape of the object, and is convenient to carry, especially at the temperature of the processing site and mobile operations.
- **Multipurpose:** Test the surface temperature of solid media of various shapes, measure the temperature of liquid, gas, rubber, and the inside of the granary.
- **304 Stainless Steel Probe:** Select high quality stainless steel tube, bendable, high temperature resistant, high sensitivity, and durable.
