

introduction:

Yunombo Digital Paint Thickness Gauge for Car Paint Thickness Gauge with Russia English Manual

This product is a portable paint thickness gauge, which can measure the thickness of non-metallic coatings (such as paint, film, etc.) on the metal substrate quickly, nondestructively, and accurately. It is mainly used for measuring the thickness of the car surface paint and other paint measurement.

Measurement range	0~1800μm/0~1.8mm/0~71mil
Resolution	50μm/0.05mm/2mil
Measurement error	±100μm/0.1mm/4mil
Minimum diameter of substrate	φ 50 mm
Minimum thickness of substrate	0.5mm
Work temperature range	18~30°C
Work humidity range	10~80%RH
Batteries	CR2032*2
Outline Dimension	35.9*83.3*22mm
Weight	63.98g (without batteries)
